

Questionnaire - Nesterenko Software – Tally/Sectioning Assistant

Dec. 2011

Note: If you have already been using the Timetable (Master Schedule) Assistant application, it is not necessary to complete this form.

Note: I already have the information below (items 2, 3, 4) for many School Boards. If any schools in your School Board already use either of these applications, it is not necessary to complete items 2,3,4

The Tally/Sectioning Assistant can be configured to meet the needs of each unique school scenario.

Your Name: _____ Email Address: _____

SchoolName: _____ School Board: _____

1. Version of MS-Access installed on computers: Access 2000, 2003, 2007, 2010 _____.

2. Which Email Client do you use? FirstClass Outlook Other _____

3. Class Maximums: Most School Boards have class size maximums (usually specifically stated in a Collective Agreement). This application uses the 4th (or 4th and 5th) character of course code to determine most 'Class Maximums'. In addition there are usually a variety of 'Special Class Maximums' for Tech courses, AP, IB, etc. eg. Maximums based on 4th character: Academic 28, Applied 24, Open 26 etc. Special Maximums: Tech 20 etc.

Also, is there any Flex Factor language?

Preferably, send Class Maximum and Special Class Maximum language in an email attachment, or list here.

4. Combined Class Maximums: (Multi-Grade, Multi-Stream) Some scenarios for 'Combined Classes' follow:

a. Maximum will be the lowest maximum of the courses combined.

b. Maximum will be the average of the maximums of the courses combined.

Briefly explain your Board language and include in an attachment, if necessary.
